What is a payday loan?

A payday loan is a small amount of money used to cover urgent expenses and then repaid on your next payday. Getting a loan before payday enables you to pay for things that arise unexpectedly and can't wait until your next wages land in your bank account. For example, this type of short-term loan could help you cover untimely bills, medical costs and repairs.

A representative example

Loan amount \$1 000 borrowed and fully repaid after 12 months of using the loan. Total amount payable = \$1 480. The fee would be \$480.
